Ok, this is going to be a very nfs underground2 inspired drift game... witch is good, really good! It has a lot of potential while being at alpha state now. They ve got the gameplay working pretty well and I think there is a learning curve with fully upgraded cars. I only used the S13 now. The cars also really change their handling with tuning, sadly most tuning options only affect the hp.

I hope differential adjustment, wheel choice, stabilisators, spacers, weight distribution and reduction will be added soon. Also the map is not really interesting or large at all. But I think the developers should focus on the mechanics for now.

The body tuning is on level of gtaV now, not quiet old nfs titles but again, there is potential... it feels more like a tech demo now. Also the paintshemes are not fitting, low res and so on, what about importing own shemes?

After all I think if they stick to the graphics quality they go with the cars and focus on game mechancis depth for now. Because they are allready on a good way there and this is where they can kick EAs\u2665\u2665\u2665\u2665\u2665now. They can later create a cheesy career story, add a nice map and combine everything to freeroam. Also I wouldn't add too many cars for now, more concentrate on the few now existing vehicles, giving them character while keeping them balanced, add options and over all keep it compact but make it good.

Beside this: the turbo tuning is sick!. Just another shmup, but technically highend, no brainer, nice ost, smooth gameplay, alot of options & good gfx. Works fine with 360 controller.. Dev can't even order things by size. Tried to load a save, date was shown as "12/22/2018"...

Considering that lack of getting the basics right, the game is surprisingly ok. Lacks depth, but at least it's easy to get into. AI isn't exactly great, and will kill themselves on environmental hazards quite often.. I'm very satisfied with this software, it have many "things" and options to do so. for 20 Dollars It gives you plenty of options to make your game great and with all of this It's still not that hard..Also, now in fall it costs only 4 dollars, so it worth it even more. Also i want to mention that I don't saw any real bugs at all. Highly recommend. 10/10. im gay for erika. jump mechanics are no good. ie not responsive.... mabey someone will find it fun for a while. I like the locomotive, being a fan of Commuter and Intercity Passenger Services in the Northeast but the sounds are copied and pasted from the original Kuju F7 if you want better sounds for the FL9VAC just download Fan Railer's Physics Mod here at {LINK

Overall Rating: 9/10. Since it's free I won't give it a bad rating for how short this is. I feel like if it was longer, the plot twist would've had a bigger impact. Maybe it was just because I didn't read through it enough though. I'd really look forward to a longer game with more characters and levels. I'd also love it a little more if the puzzles were a little harder. I rushed through the entire game and it actually felt like I was being handed the key that lead to the next part of the game. Funny thing is, I downloaded this game because I thought I would get to be a badass agent that kills traitors for my country but what I actually got was better. But just when it got good, it ended. Overall great story, great setting, just not enough time to soak it all up. 7/10

Everything's wrong in this game, it just ♥♥♥♥ing sucks.. Please tell me I didn't buy this.. What an anticlimax. Was a very dull experience. Clearly trying to be sophisticated and stylish but the main character is not compelling enough. Also the dreadful ending. Why on earth did they use that 'stock' girls scream?? With all the care and effort in the production they spoil it with that? At least make her sound like she is seriously suffering with gasp's for a quick death. Take a look at the original Alien film for inspiration on the sounds of death. In fact take a look at Alien period on how fear should be part of the essence of this tosh.. Played 3 minutes, couldn't write a review because you need at least 5.

AFK for 16 minutes.

This game should be renamed Regret, because this is the feeling I had after buying it.

10V10. The writing isn't good. It's going for melancholy but it just never feels right, it lacks any kind of dramatic urgency, it's self-indulgent. The mechanics are minimal. You walk. You press E to engage. There are no verbs here. The game wears its ideas on its sleeves.

I would not recommend it, but it's pretty, I'll give it that.. This was definitely not worth the price. It does not add or change anything that alters any of the gameplay. This is would have served better as content patch than DLC. Hopefully the developers take this money and develop something worth buying and not another patch disguised as a DLC.. Release the 10 v 10 maps for singleplayer. As an ArmaVProject Reality player small maps are extremely boring to play. Gigantic maps make me happy. Also, I'm very disappointed this game turned down realism for balanced gameplay. The balance comes in numbers, not limiting what units are capable of doing in real life. Please give us at least 1 realistic wargame Eugen.. Fun little dungeon crawler

Nice chunk of enemies, the deaths are fair, though I see myself going for the exp bonus every new dungeon.

All in all, give it a shot, form your own opinion on it.. Its a funny game for a small price. You cant do wrong in buying it ;)

Team Red. **Ellen Teaser: The Fall - Play on Aug 13th:**

Hello Guys,

We are very excited to talk about our upcoming playable teaser which has 40 min+ play time. It was a couple of months ago after the release of the Ellen Demo that we decided to work on a playable teaser along with working on our final release of the game.

Reason? You guys! We had a great response from the community overall on GameJolt, Steam and Itch.io. We decided to compile a summary of the whole game and let the players enjoy the below:

-
- Different Environments
 - Taste to simple puzzles
 - Classic spooky elements
 - Introduction to some of the dark entities in the game

So you are going to play as James, you are alone in the house, you will be investigating the mysterious murder of The Smiths' and look for Ellen.

Just 2 more days to go and now we are free to talk more about our development and share as we approach the release of our final game.

Thank you for your amazing support! We can't wait for all the let's players to take up on it and we're also looking forward to hear feedback from all of you so that we not only create something better than our upcoming playable teaser but finish an AWESOME game!

Don't forget to save about an hour this coming monday!

See ya all ^^

Team Red. Improvements, Xbox Controller & Mac Build.:

Thank you very much for downloading and playing Ellen, it's well received by the community and we are excited to read what people have to say.

Ellen is out since a week and considering the feedback we have couple of things we'd like to highlight and address in this thread:

1. We are going to be working on the references of the puzzles make them easy for some. The puzzles are logical but tricky and we only decide to do it so to make it bit easy for some who are happen to be spending more time.
2. We decided to map Xbox controller in the game and we are going to cover the main game-play. However for puzzles you'd still need mouse and keyboard.
3. Get ready we are bringing Ellen on Mac!

If you have played the game already, we'd appreciate if you could leave a review on the store page. It helps everyone learn more about the game and definitely recommends the right audience.

At any point you'd like to connect with the developers, please start a thread in the Community Hub or leave a comment below. We'd love to hear from you!

We will post another announcement in the mid week with the progress!

Team Red. Looking forward for your feedback!:
