Promotions LED WIZARD 7 The latest version of the revolutionary LED Wizard line of programs, LED Wizard 7, offers new features including a 16:9 ratio header matrix layout, allowing designers to create a variety of header designs to replace traditional raised pixel matrix header design. LED Wizard 7 also offers several new features including a new primary matrix layout and a new secondary matrix layout, allowing the user to design a 16:9 ratio frame around any of the LED Wizard 7 16:9 ratio header designs. In addition, the secondary matrix can be configured to hold up to four optional logos. LED Wizard 7 is built upon the revolutionary development and design tools and theories of Aries Graphics International, helping the user to create effective and beautiful custom LED designs. The transport behavior of polycyclic

aromatic hydrocarbons (PAHs) in a subsurface saturated porous medium with both hydraulic loading rate and turbulence intensity was investigated using both numerical and experimental methods. The numerical results showed that when the hydraulic loading rate was maintained at 5 L/m²/s, the removal rate of the PAHs was nearly independent of the turbulent intensity, and the adsorption capacity increased with the increasing turbulence intensity. However, when the hydraulic loading rate was maintained at 5 L/m²/s and the turbulence intensity was reduced, the adsorption capacity decreased with increasing turbulence intensity. The trend of PAH removal rate as a function of hydraulic loading rate and turbulent intensity was also observed experimentally in a two-dimensional model. Therefore, when hydraulic loading rate and turbulence intensity are adjusted simultaneously, the removal rate of PAHs can be effectively controlled.

Edwin H. Cooper Edwin Harrison Cooper (September 11, 1895 – October 27, 1972) was an American football coach. He served as the head football coach at the University of Arkansas, the University of Texas, the University of Texas at Austin, and the University of Arkansas at Little Rock, compiling a career college football coaching record of 38–21–3. Cooper led the Razorbacks of the Southwest Conference to a conference title and a share of the conference's co-national title in 1923. He was named the conference's
